

Merit LILIN Network Product Vulnerability Notification

Document Number: M00168

Date: 12/18/2021

Dept.: Technical Support, Taipei

Vulnerability Notification

Summary: No threat from the security vulnerability of Log4j for all LILIN products

On Friday, December 10, 2021, the Apache Software Foundation announced the critical security vulnerability in its "Log4j" software. After reviewing LILIN's products and clouds, there is no threat from the security vulnerability of Log4j for all LILIN products and cloud services.

- (1) LILIN Linux embedded products, NVR/DVR/IP camera are proprietary. There is no Apache service and Log4J software in the product line.
- (2) LILIN NAV product lines are Windows. There are no Apache service and Log4J software in the product line.
- (3) LILIN cloud services including DDNS service, LILIN agent cloud, and LILIN event cloud do not use Log4J software.
- (4) LILIN internal ERP system, source code control, and file download server do not contain Log4J software.
