Description

ANPR-FL is the platinum version and perfect technology to read vehicle registration plates suitable for moving cars. ANPR (Automated Number Plate Recognition) is able to read the registration number and characters of vehicles from digital pictures. LILIN's ANPR system allows versatile and client-specific applications such as comparison of license plates with a Blacklist, Whitelist, and Exclusion List. ANPR software configuration dongle device on NVRs are able to capture license plate numbers and transit images back to NVRs in central control room in identifying and screening each vehicle to enter the property.
